Rosen Publishing Group,U.S., United States, 2001. Hardback. Book Condition: New. 268 x 205 mm. Language: English . Brand New Book. This new science and health series goes in-depth in examining how the human body operates. Each book corresponds with one of the body s eight major systems, including the muscular, circulatory, and reproductive systems. With diagrams and pictures to highlight the easy-to-read text, young readers will be transported into the inner workings of the body. A great resource for research and reports.How does that soft lump of human flesh get out of bed every morning? How does it walk to school, work out in the gym, and carry its schoolbooks home every day? The skeletal system makes this all possible by providing a rigid framework of hard bones to support the soft tissues of the body and make movement possible.
