Stop adding the solution from the burette the moment the color is permanent. 4. Read the level of the liquid remaining in the burette. The reading shows the amount of acid present. The experience of those using the test indicates that where the acidity of the cream is right, to secure the best results in yield and flavor of butter, from 38 to 42 cc. of the neutralizer will be required for the test. It is a simple matter for each butter maker to learn by experiment the exact degree of acidity and churning temperature suited to the best results, and with these as standards reduce the process of butter-making to a certainty. By testing his...
